

# AIR CANNON EXCHANGE PROGRAM

Spring 2016

## The Flash Advantage

The Flash Air Cannon is the fastest firing, and safest air cannon in the industry. The Flash Cannon design incorporates a built-in isolation valve, which allows maintenance on any cannon in your facility, even with an active preheat tower.

This cannon will keep your operation flowing freely, at nearly half the price of the competition. Contact us below for additional technical information.

## Exchange it and Save!

For Spring 2016, ACT is celebrating 25 years serving the industry by passing the savings onto you, our loyal customer. With each competitor cannon you replace with the Flash Cannon, you will receive 15% off your total order.

When placing your order, just say, "I want the Flash." to receive your 15% discount.
