MORE PRODUCTIVE.

## Blast away material build up with Air Cannons!!!

The ACT Group offers a full line of air cannon technologies; representing both established traditional designs and the latest leading-edge innovations in valve design, as well as hybrid and multiple-valve and -port technologies. Air Cannons discharge compressed air into a solid storage or process vessel to dislodge buildups and improve material flow. These air cannons feature cold-welded air tanks that when signaled—discharge the stored air through a special valve in an instant eruption.

### Martin® Big Blaster Hurricane Air Cannon -

- Positive acting internal valve design.
- Simple maintenance no tank removal.
- Valve assembly removes quickly.
- Able to be fired by a solenoid 200 feet away.
- Available with Tornado exhaust valves to increase force up to 20%.
- Available in 3 sizes. 35, 70 and 150 liter.

### Martin® Big Blaster® Category 5 Hurricane Air Cannon -

- Multi-valve application technology.
- Standard Hurricane valves included.
- For five application points using a single reservoir.
- Continues working if one valve requires service.
- Negative-pressure firing
- Typhoon valves available as well.
- Ideal for hard-to-reach areas.
- Removes components from exposure to high temperatures and process dust.

## New air cannon technology—The Typhoon

### Martin® Big Blaster Typhoon Air Cannon -

- Hybrid valve concept provides more force with less air than the standard XHV cannon.
- One-step maintenance.
- Excellent for high temperatures.
- Requires only one air line to fill tank and trigger valve.
- Features a rigid steel mount and tolerates vibration.
- One easy step to replace valve assembly.
- Available in 3 sizes. 35, 70 and 150 liter.

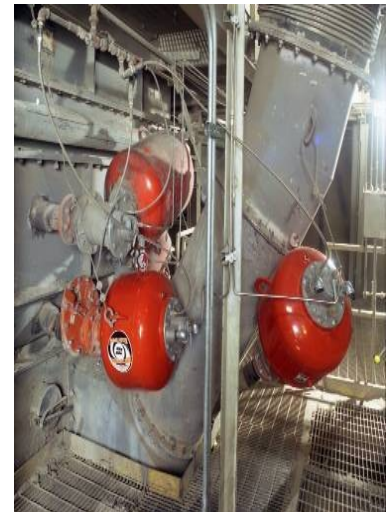

## Installation and Service by The ACT Group

An ACT sales representative will come and review your application to determine the best air cannon and locations for your installation to improve your material flow and prevent further buildup.

Our service technicians are experienced in the install of air cannons. ACT can install them with our crew or supply a supervisor to assist your crew in the installation.

Do you need service on your existing air cannons? ACT can inspect your current equipment and make repairs so you are getting the best performance out of your cannons.

Call today to setup an appointment with your ACT representative.
