Magnetic Separators

These magnetic separators are for use in helping to separate tramp ferrous metals from conveyed material. Most commonly they are suspended above and across the belt pulling metal up and away from the product flow. Magnetic Separators are available in heavy duty and super duty field strengths and in manual and self-cleaning configurations. Magnetic pulleys are manufactured to CEMA standards and can be used in most any head pulley application.

Self Cleaning Permanent Magnetic Conveyor Pulleys

- Reduce operating expenses by removing tramp ferrous metals from expensive equipment.
- Heavy grade steel frame with head pulley and tail pulley.
- Shipped ready for installation.

Manual Cleaning Permanent Magnetic Separators

- Lifetime warranty on the performance of the magnetic field strength.
- Two mounting options: Across from the belt or in-line at the discharge point of your conveyor.

Permanent Magnetic Conveyor Pulleys

- Meets or exceeds CEMA/ANSI specifications.
- Exclusive One Piece Rolled in Crown ensures consistent proper belt tracking and tighter tolerances.
- Automatically turns any conveyor into a magnetic separator.
